

FAASTeam presents:

# Predicted Performance Aircraft Seminar

Precise Performance calculations involves the interpretation of POH data and then comparing it to your actual airplane and your flying skills. This calculation is required for pilots under FAR part 91. This seminar will also be a precursor to our second annual Precision Performance Competition in the Spring of 2022.

Our safety seminar will discuss and apply how to calculate these performance numbers prior to flight along with the assistance of local CFI's. The seminar will be preceded with a Potluck mixer for pilots. Here is the timeline: 1200L-1300 Potluck mixer 1300L-1400 Performance Calculation Seminar (Bring your POH) 1400L-1500 Joint 99's & WPA chapter meeting

Please RSVP if you intend to attend the Potluck at [A320grm@aol.com](mailto:A320grm@aol.com) and bring a folding chair. Before attending any seminar, please review and abide by current CDC, State and Local health guidelines.

**Directions:** Flylt Academy FBO hangar  
Prior to attending a safety seminar, please review and abide by current CDC, State and Local health guidelines.
